NUMBER 1

M. Sarfarazi	1	A micromechanical model of microcracking for brittle polycrystalline solids
L. Schovanec	21	An antiplane shear crack in a nonhomogeneous elastic material
H. Alawi, A. Ragab and **M. Shaban**	29	Stress corrosion cracking of some steels in various environments
B. Nageswara Rao and **A. R. Acharya**	39	Charpy V-notch impact test: a partial alternate to ASTM E 399 fracture testing for routine quality control applications
M. S. Madhukar, J. Awerbuch, A. C. W. Lau and **E. S. Reddy**	43	A nonlinear lumped fiber model for the analysis of fracture behavior of notched unidirectional metal-matrix composites
R. Bell, I. A. Pagotto and **J. Kirkhope**	65	Evaluation of stress intensity factors for corner cracked turbine discs under arbitrary loading using finite element methods
X. S. Zhang (S. S. Chang)	81	A central crack of mode III across the interface between two orthotropic media in a rectangular sheet
S. Viswanath, M. V. V. Murthy, A. V. Krishna Murty and **K. P. Rao**	91	A special crack tip element for bending of plates with through cracks from a sixth-order plate theory
W.-C. Wang and **T.-L. Chen**	111	Half-fringe photoelastic determination of opening mode stress intensity factor for edge cracked strips
M. Kumosa and **D. Hull**	123	Finite element analysis of a circumferentially cracked cylindrical shell loaded in torsion
R. S. Langley	137	Stochastic models of fatigue crack growth
D. T. Read	147	Measurement of applied J-integral produced by residual stress
B. H. Kim and **C. R. Joe**	155	Single specimen test method for determining fracture energy (J_c) of highly deformable materials
J. Qu	163	Discussion of general solutions of a central crack in a strip sandwiched between two different outer layers
	I	Software Survey Section

NUMBER 2

S. Duan, K. Fujii and K. Nakagawa	167	Finite stress concentrations and J-integrals from normal loads on a penny-shaped crack
D. Taylor	177	The measurement of near-threshold fatigue crack growth
Kang Yong Lee and Heung Soap Choi	183	Determination of thermal stress intensity factors for rigid cusp cracks under uniform heat flow
R. Kumar and S. B. L. Garg	195	Influence of stress ratio and material properties on effective stress range ratio and crack growth
K. N. Shivakumar and J. C. Newman, Jr	203	Numerical fracture simulation of bend specimens using a CTOD criterion
Kuen Y. Lin and H. H. Hartmann	211	Numerical analysis of stress singularities at a bonded anisotropic wedge
B. M. Kim and C. R. Joe	225	The effect of remote energy absorption in determining J_c value
A. G. Miller and R. A. Ainsworth	233	Consistency of numerical results for power-law hardening materials and the accuracy of the reference stress approximation for J
R. Arone	249	Probabilistic fracture criterion for brittle body under triaxial load
P. Kittl and G. Diaz	259	On the Seewald–Karman correction in fracture statistics of round brittle beams under flexure
A. Carpinteri	265	Post-peak and post-bifurcation analysis of cohesive crack propagation
C. W. Woo, Y. H. Wang and Y. K. Cheung	279	The mixed mode problems for the cracks emanating from a circular hole in a finite plate
J. Q. Clayton	289	Modelling delay and thickness effects in fatigue
T. Nishioka	309	Invariance of the elastodynamic J integral (J'), with respect to the shape of an infinitesimal process zone
S. Davidson and G. Melrose	321	The solution of a certain dual cosine series relation occurring in orthotropic fracture
N. T. Younis and L. W. Zachary	327	Discussion of The Stress Intensity Factors of Internal Radial Cracks in Rotating Disks by the Method of Caustics
	I	Software Survey Section

NUMBER 3

J. Xie and **Y. W. Shi**	329	Fracture toughness for the specimens with shallow cracks
V. Bicego	339	Low cycle fatigue life predictions in terms of an EPFM small crack model
G. A. Papadopoulos and **P. I. Poniridis**	351	Crack initiation under biaxial loading with higher-order approximation
R. O. Ritchie, Weikang Yu and **R. J. Bucci**	361	Fatigue crack propagation in ARALL® Laminates: measurement of the effect of crack-tip shielding from crack bridging
K. T. Sundara Raja Iyengar, B. K. Raghuprasad and **H. Ananthan**	379	Effect of interaction of macrocracks on the stress intensity factor in a beam
G. P. Gibson	387	Evaluation of the a.c. potential drop method to determine J-crack resistance curves for a pressure vessel steel
A. D. Amir Kazemi, N. Srinivas Murthy and **N. Govinda Raju**	403	Stress intensity factor determination of radially cracked circular rings subjected to tension using photoelastic technique
W. Schmitt and **R. Kienzler**	409	The J-integral concept for elastic–plastic material behavior
Chen Zhi Gang and **Zhang Xing**	419	A close form solution of stress intensity factors for cracks in three dimensional finite bodies by energy release rate method
Tai-Yan Kam	443	Reliability analysis of brittle structures under thermal shocks
K. Wallin	449	The effect of ligament size on cleavage fracture toughness
W. Brocks and **Huang Yuan**	459	Numerical investigations on the significance of J for large stable crack growth
A. Shukla, B. D. Agarwal and **B. Bhushan**	469	Determination of stress intensity factor in orthotropic composite materials using strain gages
G. V. Srinivasan and **A. V. Virkar**	479	Application of the electrical analog technique in fiber-reinforced composites
		Technical Note
K. Rahka	493	Instrumented compact crack arrest testing
	I	Software Survey Section

NUMBER 4

Li Guangxia, Li Xiping, Li Changchun and Cao Shuyun	499	A micro and macro analysis of strain at crack tip
Xingfu Chen, Yunbing Lu and Hao Lee	509	An endochronic plastic theory with anisotropic damage
G. Tsamasphyros and A. E. Giannakopoulos	515	The optimum finite element grids around crack singularities in bilinear elastoplastic materials
K. Wallin	523	The effect of ductile tearing on cleavage fracture probability in fracture toughness testing
N. Sela, L. Banks-Sills and O. Ishai	533	Influence of a tough layer within an orthotropic plate on the mode I stress intensity factor
C. R. Chiang	545	Mode III interface crack propagation
B. Nageswara Rao and A. R. Acharya	551	Fractured analysis of a surface cracked plate under tension
F. J. Zwerneman and K. H. Frank	561	Stress intensity factor for a tee-shaped weldment
S. Duan, H. Yazaki and K. Nakagawa	573	A crack at the interface of an elastic half plane and a rigid body
Y. Nakai and R. P. Wei	581	Measurement of short crack lengths by an a.c. potential method
H. Kemper, B. Weiss and R. Stickler	591	An alternative presentation of the effects of the stress-ratio on the fatigue threshold
C. L. Chow and J. Wang	601	On crack initiation angle of mixed mode ductile fracture with continuum damage mechanics
C. M. Ward-Close, A. F. Blom and R. O. Ritchie	613	Mechanisms associated with transient fatigue crack growth under variable-amplitude loading: an experimental and numerical study
Chen Zhi Gang and Zhang Xing	639	A closed form solution of stress intensity factor about a circular tube with a surface crack by energy release rate method
T. Sakai and K. Fujitani	653	A statistical aspect on fatigue behavior of alumina ceramics in rotating bending
	665	Errata
	I	Software Survey Section

NUMBER 5

T. J. van Blaricum, P. Bates and R. Jones	667	An experimental investigation into the effect of impact damage on the compressive strength of step lap joints
P. K. Liaw, A. Saxena and J. Schaefer	675	Estimating remaining life of elevated-temperature steam pipes—Part I. Materials properties
P. K. Liaw, A. Saxena and J. Schaefer	709	Estimating remaining life of elevated-temperature steam pipes—Part II. Fracture mechanics analyses
H. Chong Rhee	723	Stress intensity factor evaluation from displacements along arbitrary crack tip radial lines for warped surface flaws
T. Fett	731	An approximative crack opening displacement field for embedded cracks
E. Smith	739	The effect of pipe bends on the stability of a circumferential through-wall crack in a type 304 stainless steel piping system. Exact theory accounting for axial strains in the piping segments
A. Kaczyński and S. J. Matysiak	745	A system of interface cracks in a periodically layered elastic composite
G. S. Giare and R. Shabahang	757	The reduction of stress concentration around the hole in an isotropic plate using composite materials
Weili Cheng and I. Finnie	767	Stress intensity factors for radial cracks in circular cylinders and other simply closed cylindrical bodies
T. Q. Yu, X. S. Miao, J. M. Xiong, H. Jiang and H. Lee	775	An orthotropic damage model for concrete at different temperatures
J. W. Nichols and S. Mall	787	The fracture behavior of thin 6061 T-6 aluminum at rapid heating rates
S. A. Kuliyev	795	Torsion of hollow prismatic bars with linear cracks
G. C. Salivar, J. E. Heine and F. K. Haake	807	The effect of stress ratio on the near-threshold fatigue crack growth behavior of Ti–8Al–1Mo–1V at elevated temperature
F. Ellyin and D. Kujawski	819	Generalization of notch analysis and its extension to cyclic loading
T. Y. Kam and C. D. Lu	827	Thermal stress fracture analysis of brittle bodies
R. Kumar and S. B. L. Garg	833	Effect of prestrain on material and single tensile overload cycles on crack closure
H. Alawi and M. Shaban	845	Fatigue crack growth under random loading
	I	Software Survey Section

NUMBER 6

Hao Tian-Hu and **Wu Yong-Chang**	855	Exact elasto-perfectly plastic solution for antiplane problem of collinear rigid lines in an infinite plane
Lin Ye	861	An energy release rate criterion for crack growth in unidirectional composite materials
Yongyuan Zhang	871	Studies on fracture modal and mechanism for compressed cast iron specimen
C. Yatomi, K. Fujii and **K. Nakagawa**	881	Combined stress hypothesis for mixed-mode fracture toughness criterion
Weilin Zang and **Peter Gudmundson**	889	An integral equation method for piece-wise smooth cracks in an elastic half-plane
Ch. Zhang and **J. D. Achenbach**	899	Time-domain boundary element analysis of dynamic near-tip fields for impact-loaded collinear cracks
H. Rajiyah and **S. N. Atluri**	911	Evaluation of K-factors and weight functions for 2-D mixed-mode multiple cracks by the boundary element alternating method
S. K. Cheong and **C. S. Hong**	923	Analysis of cracks emanating from a circular hole in $[0_n/90_m]_s$ laminates under various boundary conditions
Xing Xiu-San	935	Nonequilibrium statistical foundation of fatigue fracture
Quanxin Guo, K. R. Li and **L. M. Keer**	947	The plastic stress ahead of a mixed mode I and II plane stress crack
B. H. Kim and **C. R. Joe**	953	On the ratio (Φ) of the J-integral to the total work done per unit uncracked area
W. T. Ang	965	An arbitrarily-oriented plane crack in an anisotropic elastic slab
Chiaki Ihara and **Hisaatsu Kato**	973	A stochastic damage accumulation model for creep crack propagation
John E. Schiermeier and **Barna A. Szabó**	979	Numerical analysis of stress singularities in composite materials
Nur Yazdani and **Pedro Albrecht**	997	Crack growth rates of structural steel in air and aqueous environments
		Technical Note
Subrato Dhar	1009	Defect tolerant fatigue designs for automotive components fabricated from high strength low alloy structural steel
